Summary

Frontend Developer building production React and Next.js applications. Focused on scalable component architecture, permission-driven dashboards, and reliable API integration. Comfortable owning features end to end and working closely with backend, design, and product teams.

Skills

- ReactJs
 - NextJs
 - React Query
 - Redux Toolkit
 - Zustand
- NodeJs
 - ExpressJs
 - MongoDB
 - Typescript
 - Javascript
- TailwindCSS
 - ShadCn
 - Rizz UI
 - Material UI
 - Ant D

Work Experience

FRONT-END DEVELOPER | [DIGICOM](#) | DECEMBER 2026 – PRESENT

React, NextJs, React Query, ShadCn, Tailwind CSS, Typescript, Zustand

- Built ePay admin and merchant dashboards for a payments platform, covering payouts, ledger, and compliance.
- Developed ePay approval and operations flows so payouts can be reviewed before processing, with clear error handling.
- Built the Abugida admin platform for a language-learning product for Ethiopian children in the diaspora. Role-based tools for users, subscriptions, support, and content issue reports.
- Developed Abugida’s curriculum builder for languages, lessons, exams, & media so content teams can create and preview.

FRONT-END DEVELOPER | [CONVEX ICT](#) | FEBRUARY 2025 – PRESENT

React, Shad Cn, Material UI, Ant D, Tailwind CSS

- Built sportsbook UIs with clearer navigation and real-time updates for pre-match and live betting.
- Developed reusable React components for custom layouts, themes, and branding across operator-facing screens.
- Integrated virtual sports so users could play realistic, simulated games alongside the sportsbook.
- Enhanced the casino experience by integrating games from multiple providers into a single, consistent UI.

FRONT-END DEVELOPER | [EAGLE LION SYSTEM TECHNOLOGY](#) | OCTOBER 2024 – JANUARY 2025

React, NextJs, React Query, ShadCn, RizzUI, Tailwind CSS

- Built React and Next.js mini-apps inside a bank super app, covering core flows such as payments and account actions in a mobile-first UI.
- Implemented responsive, user-friendly interfaces so banking features felt consistent with the host super app across devices.
- Managed state and asynchronous data fetching with React Query for live balances, transactions, and other banking data.
- Used ShadCn, RizzUI, and Tailwind CSS to match the super app’s design system and keep mini-app screens consistent.

FRONT-END DEVELOPER | [PURPOSE BLACK - KTS](#) | FEBURARY 2024 – SEPTEMBER 2024

React, NextJs, ShadCn, Tailwind CSS

- Built responsive React and Next.js screens for KTS digital products used across PurposeBlack’s e-commerce and operations work.
- Developed reusable front-end components with ShadCn and Tailwind CSS so layouts stayed consistent across those apps.
- Worked with backend developers to integrate APIs so lists, forms, and dashboards loaded and updated reliably.

REACT DEVELOPER | [DOWELL RESEARCH UK LIMITED](#) | JULY 2023 – DECEMBER 2024

React, Material UI, Tailwind CSS

- Built and maintained React survey and research UIs so respondents and researchers could complete studies across devices.
- Improved page performance and cross-browser support so forms and dashboards stayed fast and usable in production.
- Worked with a mixed research and engineering team to turn UX and market-research flows into Material UI and Tailwind screens.

FULL-STACK DEVELOPER | [ADDIS SOFTWARE](#) | FEBRUARY 2023 – JUNE 2023

React, Node, Express, MongoDB, Styled System

- Built responsive React UIs with Styled System for client web apps, focusing on reusable components and a consistent layout.
- Developed Node.js and Express APIs to support those apps, including secure request handling and integration with the frontend.
- Designed and used MongoDB data models so application data could be stored, queried, and updated reliably.

Education

- Bachelor of Science and Engineering at [Addis Ababa Institute of Technology](#)
